

ACTIVA

infrared barriers

The versatility, reliability and attractive design are the key benefits of ACTIVA, which ensure efficient indoor and outdoor perimeter protection.

ACTIVA range consist of 7 models, differentiated by their length and number of beams. All them are available with two different body colour.

ACTIVA

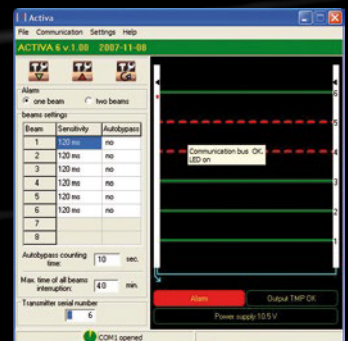

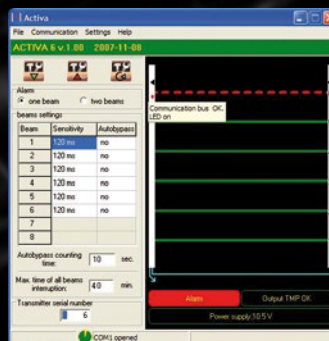

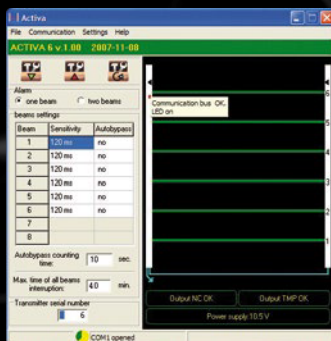

infrared barriers

FEATURES

- encrypted, synchronous transmission preventing transmitter substitution
- 20m indoor range (10m outdoor)
- installation in parallel or perpendicularly to wall
- optical and acoustic indicator to facilitate installation
- possibility of outdoor operation
- detailed configuration via PC
- tamper protection against opening and removing from surface

APPLICATIONS

- perimeter protection
- door and window protection
- unobtrusive protection of valuable collections and pieces of art
- detection of designated area violation
